Assignment no. 1

1. Introduction

- The project was about creating a div and fetching data from another component and displaying it in a specific format styling with bootstrap and reactstrap dependency.

2. Expected List of Features

- I would have used tables for rendering the array of objects and give some styling to the rows and columns such as "responsive" etc / must have used material UI.

3. Market Survey

- I was trying to create a single page web app for e-commerce site and it is quite similar to `Restorante con fusion`.
- But if I would like to mention something much more similar, it would be amazon.in, flipkart.in, myntra.com, snapdeal.com, etc.
